ABSTRACT

1. Job Portal is a web application that allows job seekers to search and apply for various job opportunities online.
2. This web application is designed to connect employers and job seekers on a single platform where companies can post job vacancies and candidates can apply easily.
3. The main purpose of the Job Portal is to simplify the recruitment process and provide detailed information about available jobs, companies, and job requirements.

○ FUNCTIONAL FEATURES: -

- Easy job searching based on category, location, or skills.
- Job seekers can view job details and apply for jobs online.
- Employers can post, update, and manage job vacancies.
- User-friendly interface with easy navigation.
- This website contains two modules: **Admin Module** and **User Module**.

ACKNOWLEDGEMENT

The feeling of gratefulness to any one's help directly arises from the bottom of heart. A small but an important and timely help can prove to be a milestone in one's life.

This project is dedicated to all the people, whom we met, took guidance, talked, interviewed and learned something from them. At this occasion we sincerely thank all of them while submitting this project report.

We would like to thank **Prof. Shivangee B Ajudiya (BCA, MCA)**. for giving time-to-time valuable guidance during the project and giving us guidance in taking my curriculum decision and choosing, initiating and getting on with the project.

We always have felt the invisible help from the almighty, without the blessings of almighty, we could not have succeeded.

DHARAVIYA KESHAV NAROTTAMBHAI.

1. SDLC OVERVIEW

2. REQUIREMENT GATHERING AND ANALYSIS

2.1 ORGANIZATION DETAILS:

1. Name of the Organization: -

MDIDM INFOWAY JAMNAGAR

2. Brief detail of the organization: -

MDIDMINFOWAYCOMPANY is a IT company established in the year 2014. The organization is located at Jamnagar, Gujarat. The company is primarily engaged in software development, web designing, IT consulting, digital marketing, networking solutions. It aims to provide high-quality services and innovative solutions to its clients.

2.2 MEETING:

I. Meeting with Owner

1. Name of Owner

- Mr. Kishna Chandravadiya

2. Owner's requirement in his words.

A web-based job portal system is required where companies can post job vacancies and job seekers can search and apply for jobs easily.

II. Meeting with user

1. Name of the user.

-Mr. Krishna Chandravadiya

2. User requirement in his words.

- A system is required where users can view job listings, check job details, and apply for suitable jobs online in an easy and efficient way.

2.3 Data which will be the input into the system....

- Text
- Image
- Job Details
- User Information

2.4 Data which will be the output into the system....

- Job Listings
- Job Details
- User Profile Information
- Application Status

2.5 Type of project....

- Online Web Application

2.6 Method for collecting data.

- Interview
- Questionnaires

3.SYSTEM REQUIRMENT SPECIFICATIONS

3.1 Introduction:

3.1.1 Purpose:

Job Portal is an online web application which enables job seekers to search for jobs and apply for them easily. It also allows employers to post job vacancies and manage job listings. The main purpose of this system is to provide a simple platform where employers and job seekers can connect with each other.

3.1.2 Intended Audience and Reading Suggestions:

The intended audience of this document is the potential end users such as job seekers and employers. This document may also serve as a reference guide for the developers of the system.

3.1.3 Product Scope:

This website will be an **online job portal system**. Anyone can visit this website and search for job opportunities. Registered users can apply for jobs and manage their profiles. The system helps to simplify the recruitment process and makes job searching easier.

3.2 Overall Description:

3.2.1 Product Function:

(i) Admin Module:

- Login
- Manage User
- Manage Job jobs
- Manage Companies
- view feedback
- view review
- manage and add blogs

(ii) User Module:

- Register
- Login
- Search Jobs
- View Job Details
- Apply for Jobs
- Manage Profile
- feedback
- review

3.2.2 User classes and characteristics:

(i.) User Classes:

- Administrator
- User

(ii.) User Characteristics:

(a) Administrator:

Administrator must be capable of managing the system such as users, job categories, companies, and job postings.

(b) User:

User should have basic knowledge of using the internet and should be able to search and apply for jobs through the portal.

3.2.3 Operating Environment:

This website will operate through the internet using hardware platforms like Monitor, Mouse, Keyboard etc. and operating systems like Windows, Linux, Android, and iOS.

3.2.4 Design and Implementation constraints:

- GUI is only in English.
- Internet connection is required.
- Users should have basic knowledge of computer.

3.2.5 Assumptions and dependencies:

- Administrator account is already created in the system.
- Job details and job categories will be managed by the admin.
- Users must register before applying for jobs.
- Roles and tasks are predefined in the system.

3.3 External Interface Requirement:

3.3.1 User Interface:

If the user is not registered, he/she can create an account by filling the registration form. After successful registration, the user can login into the system. If the username or password is incorrect, an error message will be displayed.

3.3.2 Software Interface:

- Operating System – Windows11
- Front End – HTML, CSS, BOOTSTRAP, JS
- Back End –PYTHON, MySQL Sever(database)
- Software for Front End – Microsoft Visual Studio Code
- Communication Interface – HTML Forms

3.4 System Features:

- Easy job searching based on categories and keywords.
- Job seekers can view job details and apply online.
- Simple and user-friendly interface.

- Quick navigation and job search process.
- This website contains two modules: Admin and User
-

3.5 Other Nonfunctional Requirements:

3.5.1 Performance requirement:

- Overall System should be fast and error free.
- It should have built in error checking and correction facilities.
- The system should be able to handle large amount of data.

3.5.2 Security Requirement:

- Administrator has more rights than the sub user.

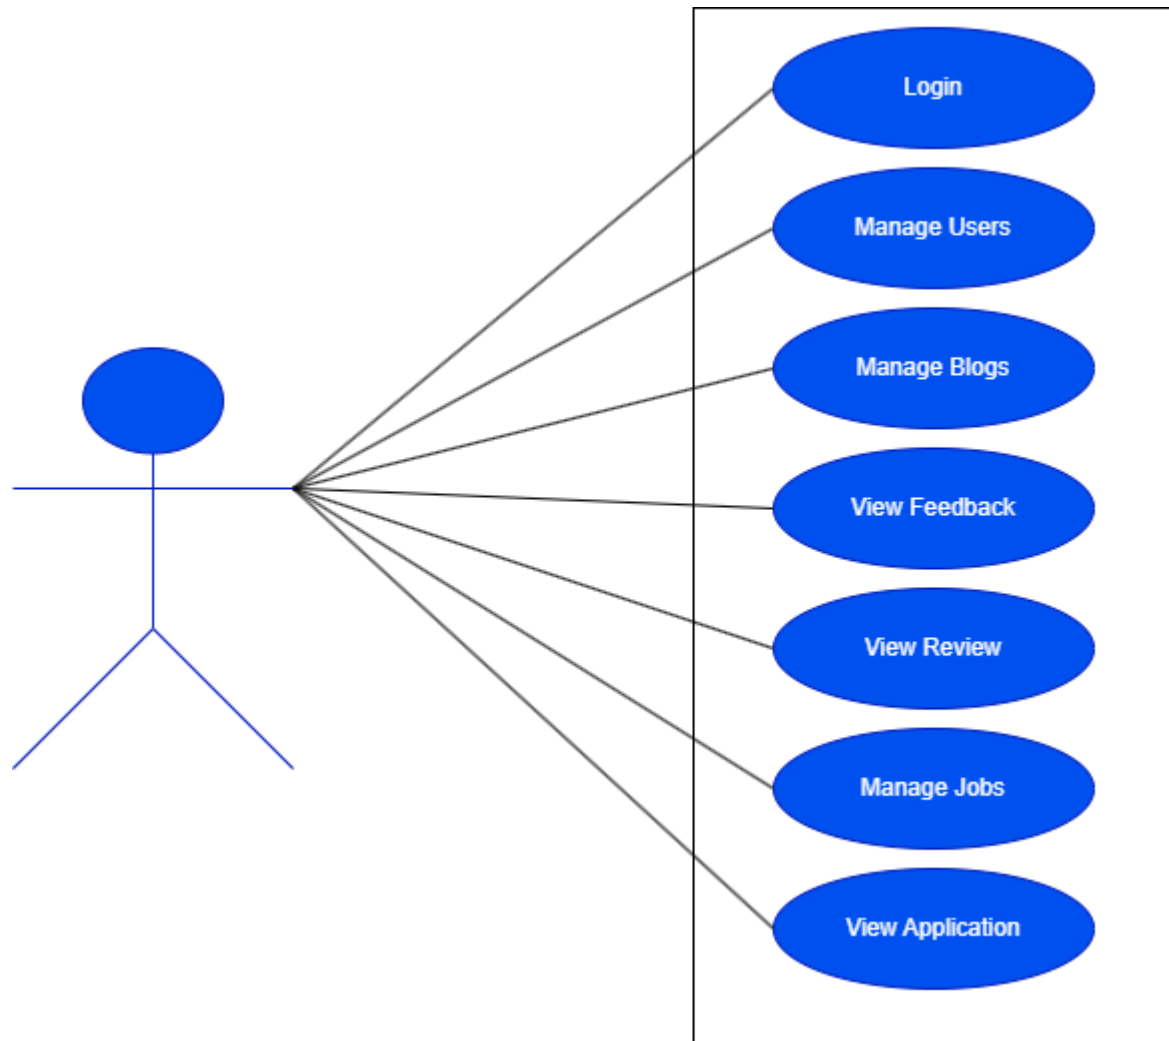

3.5.3 Safety Requirement:

- To prevent data loss in case of system failure, the data of order that were given till then must be saved in the database, for the system to resume the calculating process on reboot.

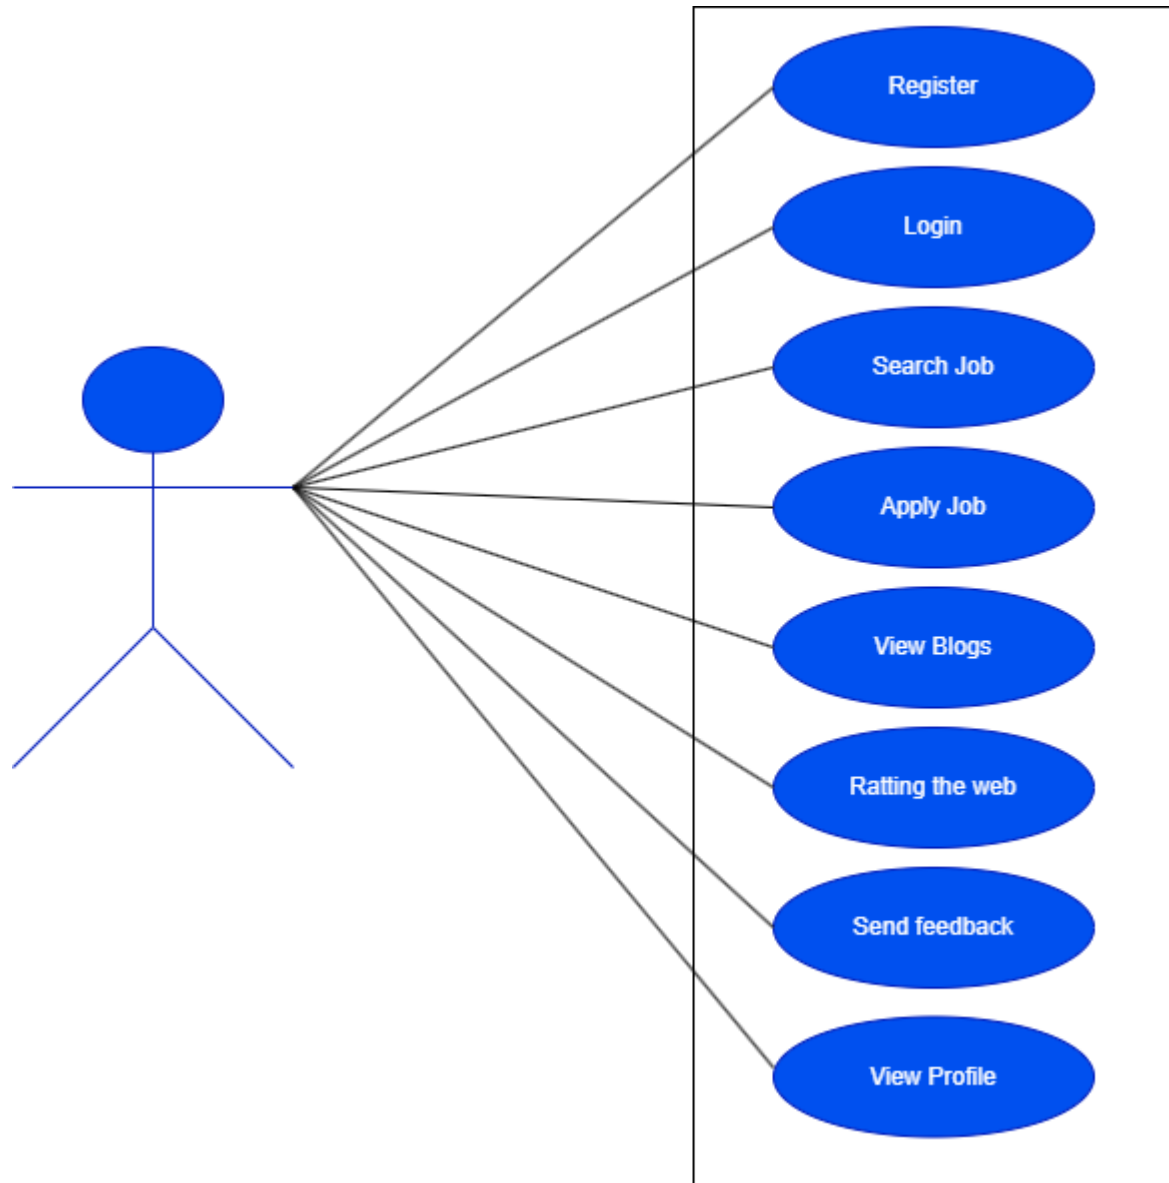

4.SYSTEM ANALASIS AND MODELING

4.1 Use case Diagram:

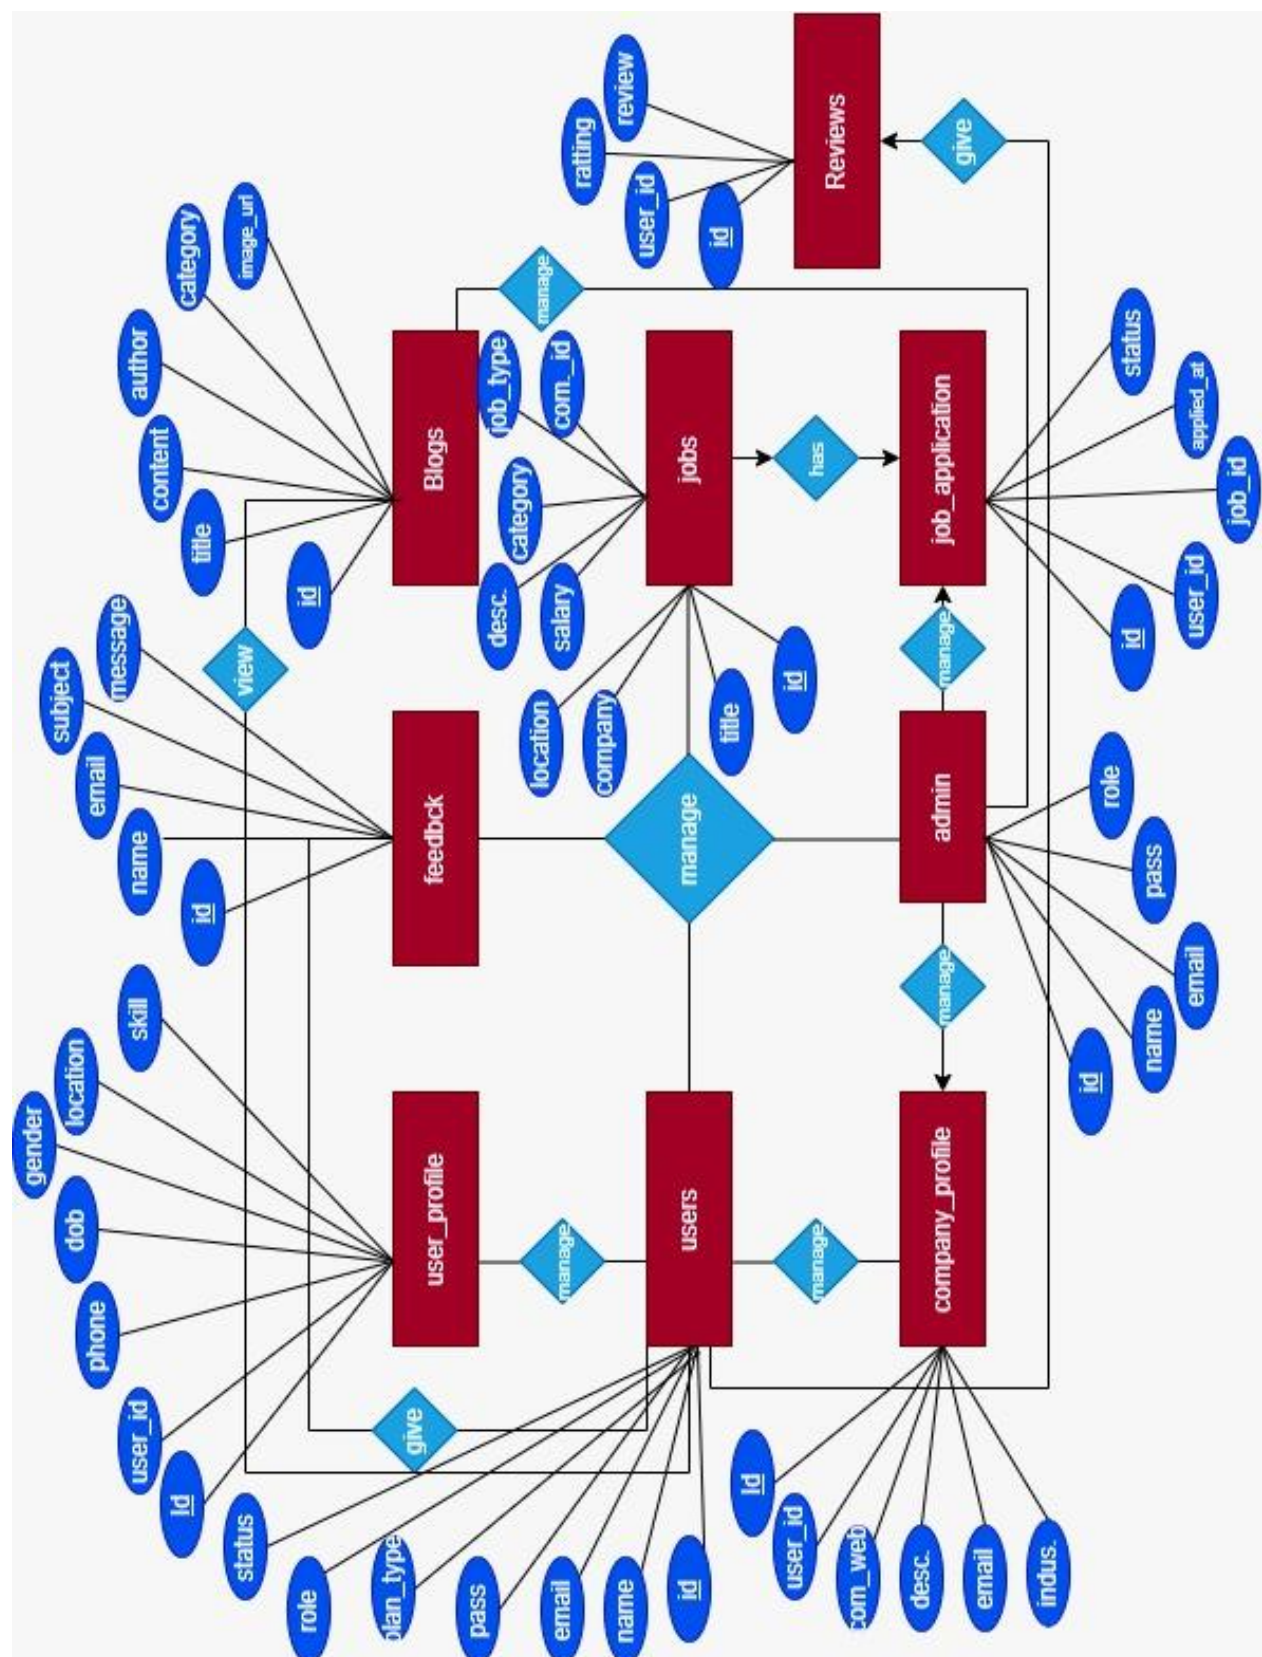

1. Admin Side

2. User Side

4.3 Data Dictionary

Table name: users

Primary key: id

Description: This table contains all users' information

Name	Data Type	Size	Description
id	int	11	Primary Key
name	varchar	45	User full name
email	varchar	45	User email address
password	text	-	User login password
status	varchar	20	Account status
verified	tinting	1	Email verification status
role	Enum	-	User role (user/company)
is_subscribed	tinting	1	Subscription status
plan_type	varchar	50	User subscription plan
app_limit	int	11	Job application limit

Table name: admin

Primary key: id

Description: This table contains admin information

Name	Data Type	Size	Description
id	int	11	Primary Key
name	varchar	100	Admin name
email	varchar	100	Admin email
password	varchar	255	Admin password
role	Enum	-	Admin role
status	Enum	-	Admin account status
created_at	timestamp	-	Account creation time

Table name: jobs

Primary key: id

Description: This table contains job vacancy information.

Name	Data Type	Size	Description
id	int	11	Primary Key
title	varchar	150	Job title
company	varchar	150	Company name
location	varchar	100	Job location
salary	varchar	50	Salary range
description	text	-	Job description
category	varchar	50	Job category
job_type	varchar	50	Type of job
created_at	timestamp	-	Job posting date
company_id	int	11	Company reference ID

Table name: job_applications

Primary key: id

Description: This table stores job applications submitted by users.

Name	Data Type	Size	Description
id	int	11	Primary Key
user_id	int	11	User ID
job_id	int	11	Job ID
applied_at	timestamp	-	Application date
status	varchar	20	Application status

Table name: feedback

Primary key: id

Description: This table stores feedback submitted by users.

Name	Data Type	Size	Description
id	int	11	Primary Key
name	varchar	100	Username
email	varchar	150	User email
subject	varchar	150	Feedback subject
message	text	-	Feedback message
created_at	timestamp	-	Feedback submission time

Table name: company_profiles

Primary key: id

Description: This table contains company information.

Name	Data Type	Size	Description
id	int	11	Primary Key
user_id	int	11	Company user ID
company_name	varchar	255	Company name
website	varchar	255	Company website
description	text	-	Company description
contact_email	varchar	255	Contact email
industry	varchar	100	Industry type
logo_url	varchar	255	Company logo

Table name: Reviews

Primary key: id

Description: This table contains website reviews.

Name	Data Type	Size	Description
id	int	11	PK
name	varchar	100	User name
email	varchar	150	User email
subject	varchar	150	Feedback subject
message	text	-	Feedback or review message

Table name: user_profiles

Primary key: id

Description: This table stores detailed profile information of users.

Name	Data Type	Size	Description
id	int	11	Primary Key
user_id	int	11	User reference ID
phone	varchar	20	Phone number
gender	varchar	20	Gender
date_of_birth	date	-	Date of birth
location	varchar	100	User location
experience_level	varchar	50	Experience level
current_job_title	varchar	100	Current job title
expected_salary	varchar	50	Expected salary
skills	text	-	User skills
linkedin	varchar	255	LinkedIn profile
i_id	int	11	Not null, foreign key

Table Name: footer_links**Primary Key:** id**Description:** This table stores footer links for the website.

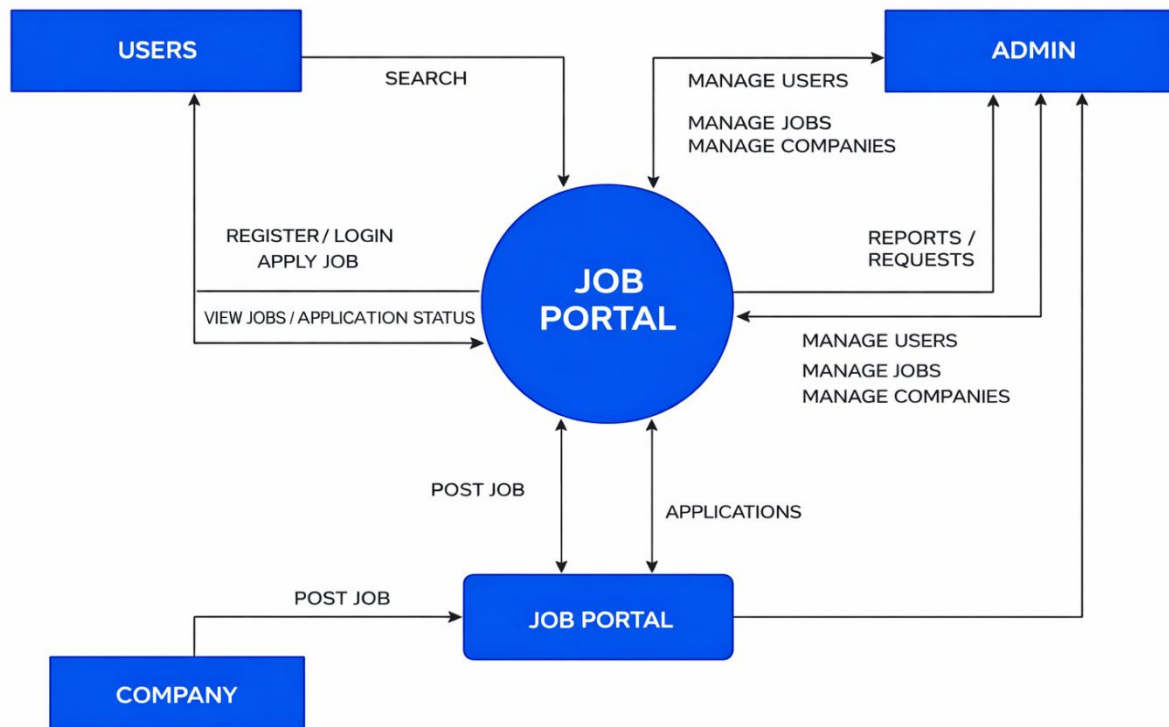

Name	Data Type	Size	Description
id	int	11	PK
title	varchar	100	Link title
url	varchar	255	Link URL
section	varchar	50	Footer section
status	tinyint	4	Link active status

Table Name: blogs**Primary Key:** id**Description:** This table stores blog posts related to career and jobs.

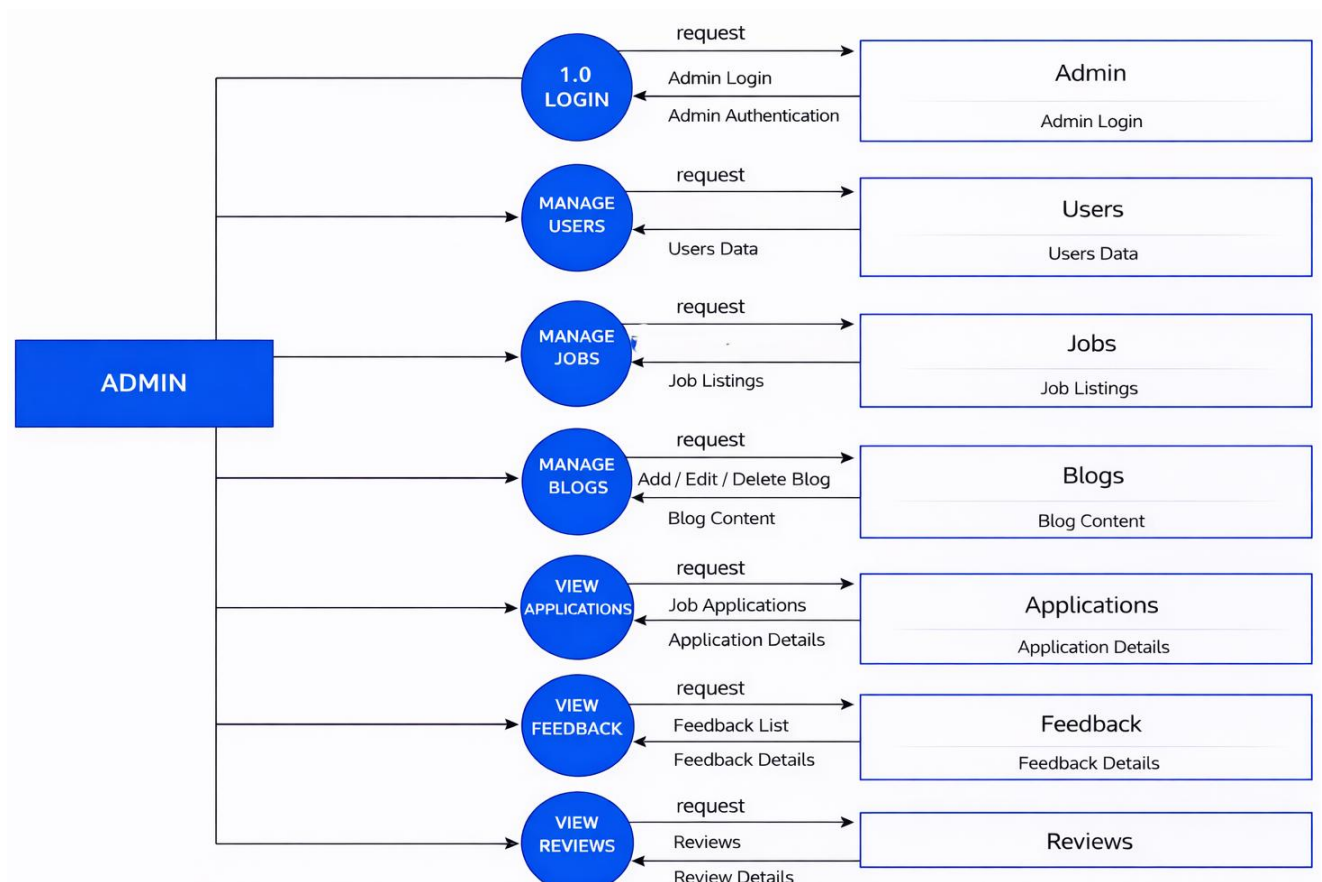

Name	Data Type	Size	Description
id	int	11	PK
title	varchar	255	Blog title
content	text	-	Blog content
author	varchar	100	Blog author
category	varchar	50	Blog category
image_url	text	-	Blog image
created_at	timestamp	-	Blog publish time

7.LIMITATIONS AND FUTURE ENHANCEMENT

- Limitations: -
 - Users cannot directly communicate with employers through chat.
 - Online interview or video call facility is not available.
 - The system does not provide automatic job recommendation based on user skills.
 - Users cannot upload multiple resumes or portfolios.
 - Real-time notifications for job updates are not available.

- Future Enhancement: -
 - In future, the overall website design and user interface will be improved.
 - Online chat between **employers and job seekers** will be added.
 - Automatic **job recommendation system** based on user skills and profile will be implemented.
 - Users will be able to **upload resumes and portfolios**.
 - Email and real-time **job notifications** will be provided.
 - Online **interview scheduling and video interview system** may be added.

8.CONCLUSION

The project entitled **Job Portal** has been completed successfully. This website has been developed carefully to provide an efficient, user-friendly, and reliable platform for job seekers and administrators. The system allows users to register, search for jobs, apply for jobs, and view application status, while the administrator can manage users, jobs, blogs, applications, feedback, and reviews effectively. The main objective of this project is to simplify the job searching process and make it faster and more convenient for users. Although the system has some limitations, they can be improved in the future with additional features and enhancements, making the website more dynamic and useful.
